

Carbon Footprint Survey

Town, State:

Year Home was built:

Approximate square feet:

Number of people living in home:

Number of Bedrooms:

Primary Heating Fuel Source:

Please visit empowermentinstitute.net/lcd/lcd_files/LCDcalcNet.html to calculate your carbon emissions and insert your numbers below. Before you visit the site, you will need: 1. your annual electrical and home fuel consumption numbers; 2. your weekly or annual car mileage and mpg; and 3. the numbers of air miles your household travels in a year. Further information on how to obtain these numbers is available on the website if you require it.

Emissions from **Trash***:

Emissions from **electricity**:

Emissions from **natural gas**:

Emissions from **propane**:

Emissions from **fuel oil**:

Emissions from **Automobile Travel**:

Emissions from **Personal Air**** Travel:

Total Emissions:

*For the calculations, please note that a small Mountain Lakes green bag contains 15 gallons and a large one contains 30 gallons.

** For consistency, please **do not include Business travel**.
